DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the method and apparatus as claimed by applicant.

In particular, the prior art fails to disclose a method for repeated access to a bodily fluid in a native patient vessel including the steps of providing an access tube occludable at the anastomosis end, anastomosing the tube to the native vessel without sutures, occluding the access tube at the anastomosis end, opening the anastomosis tube to provide fluid communication, and reoccluding the access tube, along with the other steps and limitations of the claims.

The best prior art of record, US 4,822,341 to Colone discloses an access tube that is occludable at the anastomosis end, but the access tube is connected to a non-native vascular graft that is, in turn, sutured to the patient's native vessel. Therefore, the instant sutureless apparatus and method of connecting to a native vessel is patentable over the prior art.

Examiner has reviewed the documents submitted in the IDS dated 27 April 2006 and has found the instant invention patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
